

Sean Holland, P.E., Project Manager
Alaska Department of Transportation and Public Facilities

Sean Holland is Project Manager for the Sterling Highway MP 45-60 Reconstruction project in Cooper Landing, Alaska. The Project will upgrade 4 miles of existing highway to meet current standards and construct over 10 miles of new highway alignment including a keystone bridge that will span the Juneau Creek canyon. The project is being delivered using a combination of traditional design-bid-build and Construction Manager/General Contractor (CMGC) contracting methods.

Sean graduated from the University of Maine in 1990 with a B.S. in Civil Engineering and worked for a large heavy civil contractor in various roles on a wide variety of contracts until becoming a Project Manager at ADOT&PF in 2003. He has had the opportunity to deliver many projects in Alaska ranging from planning products through design and construction. Project locations range from rural airports in the Aleutians and Western Alaska to urban interchanges in Anchorage and several projects at Anchorage International Airport. Award winning projects include Akutan Airport Design Build project, the first FAA funded, horizontal Design Build contract in the country. The Glenn Bragaw Interchange Design Build project and Midtown Congestion Relief Planning and Environmental Linkage.
